Protocols with only 2D Sequences

Face and Neck

Cranial Nerves 1 Perineural Tumor – Sequence List

Ax STIR (top orbits through mandible) 4mm

Cor STIR (lips to vertebral bodies, face only FOV) 3mm high res

Ax T1 (top orbits through mandible) 3mm high res

Cor T1 (lips to spinal cord, face only FOV) 3mm high res

Contrast

Ax T1 (top orbits through mandible) 3mm high res

Cor T1 (lips to spinal cord, face only FOV) 3mm high res

Ax T1FS (top orbits through mandible) 4mm

Cranial Nerves 1 Perineural Tumor – Slice Selection

Axial Slice Selection (angle to hard palate)

Coronal Slice Selection / Axial FOV

Cranial Nerves 1 Perineural Tumor – Example Images

General / Trans-spatial – Sequence List

Cor STIR (mid orbits to manubrium) 4mm

Ax STIR (mid orbits to manubrium) 4mm

Ax T1 (mid orbits to manubrium) 4mm

Sag T1 (mid orbits to manubrium) 3mm

Contrast

Ax DWI (mid orbits to manubrium)

Cor T1FS (mid orbits to manubrium) 4mm

Ax T1FS (mid orbits to manubrium) 4mm

General / Trans-spatial – Slice Selection

Axial Slice Selection

Coronal Slice Selection

General / Trans-spatial – Example Images

Larynx – Sequence List

Sag T1 (mid orbits to manubrium) 3mm
Ax STIR (mid orbits to manubrium) 4mm
Ax T2 FS (larynx, angled) 3mm high res
Cor T1 (larynx, angled) 3mm high res
Ax T1 (larynx, angled) 3mm high res
Contrast
Ax T1 (larynx, angled) 3mm high res
Cor T1 (larynx, angled) 3mm high res
Ax T1 FS (larynx, angled) 4mm

Larynx – Slice Selection

High Res Axials Angled Along Vocal Cords

Angled Axial Slice Selection

Angled Coronal Slice Selection

Larynx – Example Images

Nasopharynx & Nasal Cavity – Sequence List

Sag T1 (face) 3mm

Ax STIR (mid orbits to manubrium) 4mm

Ax T1 (mid orbits to mid tongue) 3mm high res

Cor T1 (lips to spinal cord, face only FOV) 3mm high res

Contrast

Ax T1 (mid orbits to mid tongue) 3mm high res

Cor T1 (lips to spinal cord, face only FOV) 3mm high res

Ax T1FS (mid orbits to mid tongue) 4mm

Nasopharynx & Nasal Cavity – Slice Selection

High Res Axial Slice Selection

High Res Coronal Slice Selection

Nasopharynx & Nasal Cavity – Example Images

Nasopharynx & Nasal Cavity – Example Images

Optic Nerve – Sequence List

Ax T2 2mm (bilateral orbits)

Cor Obl T1 2mm (affected orbit)

Cor Obl STIR (affected orbit)

Contrast

Ax DWI (bilateral orbits)

Cor Obl T1FS (affected orbit)

Sag Obl T1FS (affected orbit)

Ax 3D VIBE (whole head)

Optic Nerve – Slice Selection

Axial Slice Selection

Sagittal Oblique Plane
Coronal Oblique Plane
FOV/Slice Selection Through Optic Chiasm

Optic Nerve – Example Images

Orbits – Sequence List

Cor T1 3mm high res (eyelid through orbit)

Cor STIR 3mm high res (eyelid through sella)

Ax T1 3mm high res

Axial T2 3mm high res

Contrast

Cor T1 3mm high res (eyelid through orbit)

Ax T1 3mm high res

Cor T1 FS 4mm (eyelid through brain stem)

Orbits – Slice Selection

Axial Slice Selection

Coronal Slice Selection / Axial FOV

Orbits – Example Images

Oropharynx & Oral Cavity – Sequence List

Sag T1 (face) 3mm

Ax STIR (mid orbits to manubrium) 4mm

Cor STIR (lips to vertebral bodies, face only FOV) 3mm high res

Ax T1 (mid nose to larynx) 3mm high res

Cor T1 (lips to vertebral bodies, face only FOV) 3mm high res

Contrast

Ax T1 (mid nose to larynx) 3mm high res

Cor T1 (lips to vertebral bodies, face only FOV) 3mm high res

Ax T1FS (mid nose to larynx) 4mm

Oropharynx & Oral Cavity – Slice Selection

High Res Axial Slice Selection

High Res Coronal Slice Selection

Oropharynx & Oral Cavity – Example Images

Oropharynx & Oral Cavity – Example Images

Parotid – Sequence List

Sag T1 (face) 4mm

Ax STIR (mid orbits to manubrium) 4mm

Cor STIR (lips to vertebral bodies, face only FOV) 4mm

Ax T1 (mandibular condyle to angle) 4mm

CISS (mid nasal cavity to mid tongue) 0.8mm isotropic

Contrast

Ax T1 (mandibular condyle to angle) 4mm

Cor T1 (lips to vertebral bodies, face only FOV) 4mm

Ax T1FS (mandibular condyle to angle) 4mm

Parotid – Slice Selection

Axial T1 Slice Selection
CISS Slice Selection

Coronal Slice Selection

Parotid – Example Images

Sinus – Sequence List

Cor T1 3mm high res (nose to brain stem)

Cor T2 3mm high res (nose to brain stem)

Ax T1 3mm high res (frontal sinus to hard palate)

Contrast

Cor T1 3mm high res (nose to brain stem)

Ax T1 3mm high res (frontal sinus to hard palate)

Ax T1 FS 3mm (frontal sinus to hard palate)

Sinus – Slice Selection

Axial Slice Selection (angle to hard palate)

Coronal Slice Selection / Axial FOV

Sinus – Example Images

TMJ – Sequence List

Closed Mouth

Cor Oblique T1 2mm high res (TMJ)

Sag Oblique T2 Fat Suppressed 2mm high res (TMJ)

Sag Oblique PD 2mm high res (TMJ)

Open Mouth

Sag Oblique T2 Fat Suppressed 2mm high res (TMJ)

Sag Oblique PD 2mm high res (TMJ)

If bilateral perform each side separately.

TMJ – Slice Selection

Sagittal Oblique Slice Selection

Coronal Oblique Slice Selection

TMJ – Example Images

Brain/Skull Base

Cranial Nerves 2 Palsy/Neuralgia – Sequence List

Ax FLAIR (brain)

Ax DWI (brain)

CISS (skull base cranial nerves)

Ax T1 (top orbits through mandible) 3mm high res

Cor T1 (lips to spinal cord, face only FOV) 3mm high res

Contrast

Ax T1FS (top orbits through mandible) 3mm high res

Cor T1 (lips to spinal cord, face only FOV) 3mm high res

Cranial Nerves 2 Palsy/Neuralgia – Slice Selection

Axial T1 Slice Selection

CISS Slice Selection

Coronal Slice Selection

Internal Auditory Canal / Temporal Bones – Sequence List

Ax T2 BLADE (whole brain) 4mm skip 0mm high res

Ax DWI (whole brain) 4mm skip 1mm

Ax T1 (IAC/labyrinth) 2mm high res

Contrast

CISS (IAC/labyrinth) 0.5mm isotropic with sag/cor reformats

Ax T1 (IAC/labyrinth) 2mm high res

Ax 3D T1 VIBE (whole brain) 1mm isotropic with sag/cor reformats

Internal Auditory Canal / Temporal Bones – Slice Selection

Axial Slice Selection (Midline Reference)

Axial Slice Selection (Temporal Bone Reference)

Pituitary – Sequence List

Sag T1 (sella) 3mm

Ax DWI (whole brain) 4mm skip 1mm

Ax T2 (whole brain) 4mm skip 1mm

Ax T2 FLAIR (whole brain) 4mm skip 1mm

Cor T1 (sella) 3mm

Sag 3D T2 (sella) 0.6mm

Contrast

Cor T1 (sella) 3mm

Sag T1(sella) 3mm

Ax 3D T1 (whole brain) 1mm with sag/cor reformats

Pituitary – Slice Selection

Coronal Slice Selection

Sagittal Slice Selection

Pituitary – Example Images

Internal Auditory Canal / Temporal Bones – Example Images

Skull Base – Sequence List

Ax T2 BLADE (whole brain) 4mm skip 0mm high res
Ax DWI (whole brain) 4mm skip 1mm
Ax T1 (skull base cover tumor) 3mm high res
Contrast
CISS (skull base cranial nerves) 0.8mm isotropic
Ax T1 (skull base cover tumor) 3mm high res
Cor T1 (skull base cover tumor) 3mm high res
Ax 3D T1 VIBE Fat Suppressed (whole brain) 1mm isotropic
with sag/cor reformats

Skull Base – Slice Selection

Axial T1 Slice Selection
(Adjust to Cover Tumor)

CISS Slice Selection
(DO NOT ADJUST)

Coronal Slice Selection
(Adjust to Cover Tumor)

Skull Base – Example Images

Skull Base – Example Images

Other

Brachial Plexus – Sequence List

Cor STIR SPACE (angled to C5-C7) 1.3mm bilateral

Sag T1 4mm side of interest only

Cor T2 (angled to C5-C7) 4mm bilateral

Ax T1 4mm bilateral

Ax T2 4mm bilateral

Cor T1 VIBE (angled to C5-C7) 1.3mm bilateral

Contrast

Cor T1 VIBE (angled to C5-C7) 1.3mm bilateral

Ax T1 4mm bilateral

Brachial Plexus – Slice Selection

Coronal FOV
Axial Slice Selection

Sagittal Slice Selection

Coronal Slice Selection
(angled to C5-C7)

Brachial Plexus – Example Images

Cervical MRA C+ - Sequence List

Cor T1 GRE mask

Ax T1 Fat Suppression (if requested for dissection)

Contrast

Cor T1 GRE

- Spin MIP reformat bilateral
- Spin MIP reformat right
- Spin MIP reformat left

Cervical MRA C+ - Example Images

Cervical MRA C- - Sequence List

2D TOF cervical arteries

- Spin MIP reformat bilateral

3D TOF carotid bifurcations

- Spin MIP reformat bilateral
- Spin MIP reformat right
- Spin MIP reformat left

Ax T1 Fat Suppression (if requested for dissection)

Cervical MRA C- - Example Images

Protocols with 3D Sequences

General / Trans-spatial – Sequence List

Cor STIR (mid orbits to manubrium) 4mm

Ax STIR (mid orbits to manubrium) 4mm

Sag 3D T1 TSE (mid orbits to manubrium) 1mm isotropic with Ax/Cor 1mm reformats

Contrast

Sag 3D T1 Dixon (mid orbits to manubrium) 1mm isotropic with Ax/Cor 1mm reformats

General / Trans-spatial – Slice Selection

Axial Slice Selection

Coronal Slice Selection

General / Trans-spatial – Example Images

Nasopharynx & Nasal Cavity – Sequence List

Ax 3D T1 TSE (mid orbits to mid tongue) 0.8x0.9x0.9mm with Sag/Cor 0.9mm reformats

Ax STIR (mid orbits to manubrium) 4mm

Contrast

Ax 3D T1 Dixon (mid orbits to mid tongue) 0.9x0.9x0.9mm with Sag/Cor 0.9mm reformats

Nasopharynx & Nasal Cavity – Slice Selection

High Res Axial Slice Selection

High Res Coronal Slice Selection

Nasopharynx & Nasal Cavity – Example Images

Orbits – Sequence List

Cor T1 3mm high res (eyelid through orbit)

Cor STIR 3mm high res (eyelid through sella)

Ax T1 3mm high res

Axial T2 3mm high res

Contrast

Cor T1 3mm high res (eyelid through orbit)

Ax T1 3mm high res

Cor T1 FS 4mm (eyelid through brain stem)

Orbits – Slice Selection

Axial Slice Selection

Coronal Slice Selection / Axial FOV

Oropharynx & Oral Cavity – Sequence List

Ax 3D T1 TSE (mid nose to larynx) 0.8x0.9x0.9mm with Sag/Cor 0.9mm reformats

Ax STIR (mid orbits to manubrium) 4mm

Cor STIR (lips to vertebral bodies, face only FOV) 3mm high res

Contrast

Ax 3D T1 Dixon (mid nose to larynx) 0.9x0.9x0.9mm with Sag/Cor 0.9mm reformats

Oropharynx & Oral Cavity – Slice Selection

High Res Axial Slice Selection

High Res Coronal Slice Selection

Oropharynx & Oral Cavity – Example Images

Sinus – Sequence List

Cor 3D T1 GRE (nose to brain stem) 1mm isotropic with Ax/Sag 1mm reformats

Cor 3D T2 TSE (nose to brain stem) 1mm isotropic with Ax/Sag 1mm reformats

Contrast

Cor 3D T1 Dixon (nose to brain stem) 1mm isotropic with Ax/Sag 1mm reformats

Sinus – Slice Selection

Coronal Slab Selection

Sinus – Example Images

Mass General Brigham
